Legal Notice & Open-Access AI Model Training Disclaimer

Operator: CoreSR Inc., c/o LaBarge Weinstein LLP, 800-515 Legget Drive, Kanata, ON K2K 3G4, Canada
Legal & Provenance Contact: legal@coresr.ai · **Security & Privacy Contact:** security@coresr.ai

> **Core Commitment — Open-Access, Appropriately Licensed Training Sources Only:** Every machine-learning and language model trained, pretrained, or fine-tuned by **CoreSR Inc.** (**TITAN-SR**, **GLASS**, and **ROB BERT**) is developed **exclusively from open-access resources with appropriate licences**. CoreSR does **not** use closed-source, paywalled, subscription-restricted, or unlicensed publisher corpora, unauthorized shadow libraries, or patient health records (PHI) to train its AI models.

1. Exclusive Use of Open-Access & Appropriately Licensed Resources

CoreSR builds and hosts domain-specific biomedical models for systematic literature review and evidence synthesis. To protect publishers, authors, academic institutions, and review teams, CoreSR maintains a strict data-provenance boundary for all model development:

1. **Open-Access & Permissively Licensed Material Only:** All model training, continued domain pretraining, supervised fine-tuning, and preference alignment conducted by CoreSR relies exclusively on:
   - **Permissively licensed open-weight base models** (such as Apache-2.0 and MIT checkpoints) whose licences expressly permit commercial adaptation and self-hosting;
   - **Publicly distributed scholarly bibliographic metadata** (titles, abstracts, publication types, and indexing descriptors) obtained through authorized public scholarly indexes including **PubMed / NCBI National Library of Medicine**, **Europe PMC**, **OpenAlex** (CC0), **Crossref** public metadata, and **ClinicalTrials.gov**;
   - **Open-access full-text scientific literature** distributed under permissive open licences (including the **PubMed Central (PMC) Open Access Subset** and **Europe PMC** open-access repositories under Creative Commons Attribution (**CC-BY**), **CC0**, and compatible open licences permitting text and data mining and derivative analytical uses);
   - **Publicly published methodological standards and rubrics** (such as published Risk-of-Bias and GRADE frameworks) and **internally authored or explicitly permitted structured worksheets**.
2. **Zero Closed-Source or Paywalled Training Data:** CoreSR does **not** train, pretrain, fine-tune, or distil its models on closed-source, paywalled, or subscription-restricted publisher full-text articles, proprietary commercial databases, or unauthorized third-party archives.
3. **Zero Patient Health Information (PHI):** None of CoreSR's models is trained on electronic medical records, clinical registries containing identifiable patients, or Protected Health Information governed by Ontario PHIPA, US HIPAA, or GDPR Article 9.

2. Per-Model Training Provenance & Licensing Summary

Model Family	Base Architecture Licence	Authorized Training & Adaptation Sources	Closed-Source / Paywalled Publisher Text Used?
TITAN-SR (`v7.3c-2026-11-25` , `dual3-2026-07-12`)	Permissive open-source biomedical encoders (**Apache-2.0 / MIT**)	Publicly distributed open-access bibliographic metadata (titles, abstracts, and indexing descriptors from PubMed/NCBI NLM, Europe PMC, OpenAlex CC0, Crossref public metadata, and ClinicalTrials.gov) paired with open-access systematic-review inclusion records.	**No**
GLASS (`v3`)	Permissively licensed open-weight foundation model (**Apache-2.0**)	Domain pre-adaptation on the open-access TITAN bibliographic corpus; supervised fine-tuning and alignment exclusively on open-access biomedical full texts (**PMC Open Access Subset / CC-BY / CC0** and compatible open licences), public methodological rubrics, and internally verified structured worksheets.	**No**
ROB BERT (`v6.2`)	Permissive open-source biomedical encoders (**Apache-2.0 / MIT**)	Continued domain-adaptive pretraining exclusively on open-access, appropriately licensed biomedical literature (open-access systematic reviews and trial reports from public repositories), followed by supervised fine-tuning on deduplicated structured RoB 2 worksheets paired with open-access trial texts.	**No**

Detailed technical governance controls, artifact integrity digests, and release logs are published in our AI Governance & Provenance Specification (PDF) and Model Version Changelog (PDF).

3. Strict Separation Between User Workspaces & Model Training

1. **Uploaded Study PDFs Are Never Used for Model Training:** When a reviewer uploads a PDF or retrieves a study through their own lawful institutional library subscription into a private CoreSR workspace, that document is processed **solely at inference time** to deliver the requested screening, extraction, or appraisal functionality within the Customer's workspace. Uploaded PDFs and full-text articles are **never** added to any CoreSR model training corpus on any plan tier.
2. **Team & Institution Workspaces — Zero Model Training:** As warranted in Terms of Service §8 and Data Processing Addendum §3.1, Customer Content in **Team** and **Institution** workspaces is **never** used to train, fine-tune, distil, or evaluate CoreSR models (enforced in server export pipelines), unless an institutional partner executes a separate, bilaterally signed written co-development agreement scoped strictly to its own designated corpus.
3. **Individual & Free Accounts — Opt-Out Control:** Standalone Individual and Free accounts may enable **"Exclude my reviews from model training"** in one click under **Account Settings → Privacy**, effective immediately and prospectively. Even where not opted out, uploaded PDFs, full-text articles, manuscript drafts, private notes, and personal identifiers are never exported for training — only strictly de-identified bibliographic title/abstract eligibility pairs.
4. **Customer Ownership:** Customers and their institutions retain **100% ownership** of all Customer Content and review work product generated on CoreSR.

4. Intellectual Property, Open-Access Attribution & Provenance Inquiries

CoreSR respects the copyrights, licensing terms, and moral rights of scientific authors, societies, and publishers:

- **Open-Access Licensing Compliance:** Open-access training materials are selected according to machine-readable repository licence metadata (such as PMC Open Access Subset commercial/derivative-use designations, CC-BY, CC0, and public-domain

metadata feeds) and are used to teach methodological structure and source-quote grounding — never to memorize, redistribute, or substitute for copyrighted publications.

- **No Redistribution of Publisher Full Texts:** CoreSR does not publish, resell, or redistribute copyrighted full-text publisher articles. Users are solely responsible for ensuring that any documents they upload or access via their own institutional credentials comply with their applicable institutional licences and copyright law.
- **Notice, Licensing & Takedown Inquiries:** If you are a rights holder, publisher, author, or institutional legal officer with a question regarding model training provenance, open-access licence attribution, or intellectual property, please contact legal@coresr.ai. CoreSR reviews all documented provenance and copyright inquiries promptly and in good faith.

Third-Party Appraisal Instruments & Methodological Frameworks

CoreSR provides structured workflows aligned with published evidence-synthesis and risk-of-bias frameworks. Unless expressly noted below, CoreSR is not affiliated with, sponsored by, or endorsed by the authors or copyright holders of those instruments:

- **Original Plain-Language Interface Copy:** Across public-facing worksheets, tooltips, documentation, and exported summaries for **RoB 2.0**, **ROBINS-I**, **ROBINS-E**, **ROBUST-RCT**, **PROBAST**, **PROBAST+AI**, **QUIPS**, **QUADAS-2**, **CLARITY**, **JBI Critical Appraisal**, and **INSPECT-SR**, CoreSR presents its own plain-language phrasing rather than reproducing copyrighted signalling-question wording, manuals, or crib sheets verbatim. Reviewers seeking the authoritative published text, official guidance documents, or licensing terms should consult each instrument's official source.
- **Permitted & Open-License Instruments & Integrations:**
  - **ICEMAN** (iceman.help): Used in CoreSR with permission from the ICEMAN developers; official instrument wording is retained and linked directly from the ICEMAN module.
  - **MAGICapp** (app.magicapp.org): MAGICapp export branding and logo are displayed in CoreSR with permission from the MAGIC Evidence Ecosystem Foundation.
  - **INSPECT-SR** (inspect-sr.com): Framework attributed to Wilkinson et al. under **Creative Commons Attribution 4.0 (CC BY 4.0)**, with CoreSR plain-language item wording used in the public interface and exported reports.
  - **PRISMA Reporting Frameworks (CC BY 4.0):** PRISMA 2020 (Page et al., *BMJ* 2021;372:n71), PRISMA-P 2015 (Moher et al., *Syst Rev* 2015;4:1), and PRISMA-S 2021 (Rethlefsen et al., *Syst Rev* 2021;10:39), available at prisma-statement.org under **CC BY 4.0**.
  - **CRediT Contributor Roles Taxonomy (CC BY 4.0):** ANSI/NISO Z39.104-2022, available at credit.niso.org under **CC BY 4.0**.
  - **Health Icons (CC0 1.0):** Topic icons sourced from healthicons.org under the **CC0 1.0 Public Domain Dedication**.
  - **Statistical Validation Source Papers (CC BY):** Published benchmark articles from the *Journal of Statistical Software* (Viechtbauer 2010 `metafor`, Crippa & Orsini 2016 `dosresmeta`, and Balduzzi et al. 2023 `netmeta`) are archived under their **Creative Commons Attribution (CC BY)** open-access licences.
- **Official Instrument Sources & Rights Holders:**
  - **RoB 2.0, ROBINS-I, and ROBINS-E:** riskofbias.info (published under CC BY-NC-ND 4.0).
  - **ROBUST-RCT:** Wang et al., *BMJ* 2025 (bmj.com/content/388/bmj-2024-081199; © McMaster University).
  - **PROBAST (2019) & PROBAST+AI (2025):** probast.org (Wolff et al., *Ann Intern Med* 2019, © ACP) and Moons et al., *BMJ* 2025 (bmj.com/content/388/bmj-2024-082505; CC BY-NC).
  - **QUIPS:** Hayden et al., *Ann Intern Med* 2013 (methods.cochrane.org/prognosis/tools; © ACP).
  - **QUADAS-2:** Whiting et al., *Ann Intern Med* 2011 (University of Bristol QUADAS-2; © ACP).
  - **CLARITY (Cohort):** CLARITY Group at McMaster University (CLARITY cohort tool; © McMaster University).
  - **JBI Critical Appraisal Checklists:** jbi.global/critical-appraisal-tools (© JBI / University of Adelaide).
- **Non-Endorsement & Third-Party Trademarks:**

- **GRADE Non-Endorsement:** The **CoreSR Evidence Guide** (`/grade-handbook`) is an independent educational resource authored by CoreSR Inc. CoreSR is not affiliated with, sponsored by, or endorsed by the GRADE Working Group; GRADEpro GDT is the GRADE Working Group's officially endorsed software.
- **Institutional Affiliations:** University, hospital, and academic affiliations and logos shown on team biographies identify individual team members' academic or clinical appointments only and do not imply institutional sponsorship or endorsement of CoreSR Inc.
- **Trademarks:** All third-party product names, platform names, and trademarks mentioned on CoreSR (including Zotero, Covidence, Rayyan, DistillerSR, RevMan, GRADEpro, PubMed, Embase, Scopus, and Web of Science) remain the property of their respective owners and are used solely for identification and interoperability descriptions.

5. Research Context & Methodological Disclaimer

1. **Published Academic Research vs. Production Models:** Peer-reviewed academic publications authored by CoreSR researchers (such as the 2026 *Journal of Clinical Epidemiology* TITAN-SR validation study) describe historical research prototypes evaluated in academic settings. CoreSR's production models deployed on `coresr.ai` are trained independently and exclusively on open-access, appropriately licensed resources as described in Sections 1 and 2 above.
2. **Human-in-the-Loop Responsibility & Non-Medical-Device Notice:** CoreSR's AI models generate candidate rankings, structured extractions, and appraisal drafts to support qualified human reviewers. CoreSR is a research methodology platform — **not a medical device** and **not real-time clinical decision support**. Review teams remain solely responsible for verifying all eligibility decisions, extracted data, bias appraisals, statistical analyses, and clinical or policy conclusions.
3. **Related Legal & Governance Documents:** This Legal Notice supplements and should be read together with our Terms of Service, Privacy Policy, Security & Trust Centre, PIPEDA & GDPR Data Processing Addendum, and AI Governance & Provenance Specification.
